

Product Overview

The DataGuard Pro 2TB is a high-performance external hard drive designed to securely store and effortlessly transfer your data. With versatile compatibility across Windows, macOS, and Linux systems, it serves as an ideal solution for both residential and business use. Featuring a robust design with enhanced shock resistance and encryption capabilities, the DataGuard Pro ensures that your data is not only accessible but also well-protected.

Technical Specifications

- **Storage Capacity:** 2TB
- **Interface:** USB 3.1 Type-C, backward compatible with USB 3.0 and 2.0
- **Transfer Speed:** Up to 120 MB/s
- **Dimensions:** 4.5 x 3.2 x 0.6 inches
- **Weight:** 0.5 lbs
- **Encryption:** AES 256-bit hardware encryption
- **System Requirements:** Windows 7 or later, macOS 10.12 or later, Linux Kernel 2.6.31 or later
- **Color Options:** Black, Silver
- **Warranty:** 3-year limited warranty

System Compatibility

The DataGuard Pro is compatible with all major operating systems. For optimized usage on Mac, a reformat may be necessary. Please refer to the Setup Instructions for detailed procedures.

Setup Instructions

1. **Connecting the Drive:**

2. Connect the DataGuard Pro to your computer using the provided USB-C cable.

3. The drive should appear automatically as a removable device.

4. **Formatting for Mac:**

5. Open 'Disk Utility'.

6. Select the DataGuard Pro from the list of drives.

7. Click 'Erase', choose 'Mac OS Extended (Journaled)' format for standard use or 'APFS' for modern systems.

8. Click 'Erase' to confirm.

9. **Initial Setup on Linux:**

10. Connect the drive and open a terminal window.

11. Use 'fdisk -l' to locate the drive and 'mkfs.ext4 /dev/sdX' (replace X with your drive's ID) to format if necessary.

Usage Instructions

- **For Backups:**

- Windows: Use 'File History' or 'Backup and Restore'.

- Mac: Use 'Time Machine'. Ensure the drive is formatted for Mac.

- **Data Transfers:**

- Drag and drop files via File Explorer (Windows) or Finder (Mac).

Troubleshooting

1. **Drive Not Recognized:**

2. Ensure a secure connection via the USB port.

3. Try another USB port or computer.

4. Update USB drivers:

- Windows: Go to 'Device Manager' > 'Universal Serial Bus controllers' > Right-click and 'Update Driver'.

- Mac: Run 'Software Update' from 'System Preferences'.

5. Slow Transfer Speeds:

6. Ensure the device is connected to a USB 3.1 port.
7. Check for other heavy processes running on the computer.

8. Encryption/Decryption Issues:

9. Ensure the correct password for AES 256-bit encryption is used.
10. Refer to the security software manual for managing encrypted files.

Warranty and Support

The DataGuard Pro comes with a 3-year limited warranty covering defects in materials and workmanship. For support, contact our 24/7 customer service team via email at support@dataguardpro.com or call us at 1-800-DGP-HELP.

Safety and Maintenance

- Avoid dropping or exposing the drive to extreme temperatures or moisture.
- Regularly back up critical data stored on the DataGuard Pro.
- Use the 'Safely Remove Hardware' option before disconnecting the drive from your computer.
