

EcoChill 5000 Refrigerator Documentation

Product Overview

The EcoChill 5000 is a state-of-the-art refrigerator designed to maximize energy efficiency without compromising on performance. It features a sleek design, advanced cooling technology, and convenient smart home connectivity.

- **Energy Efficiency:** Rated A++ for superior energy saving.
- **Capacity:** 450 liters, suitable for medium to large households.
- **Smart Features:** Wi-Fi enabled with compatible smart home systems.

Installation Guidelines

1. **Unboxing:** Carefully remove packaging and ensure no parts are missing.
2. **Placement:** Position the refrigerator at least 2 inches from the wall for optimal airflow.
3. **Leveling:** Use a level tool to ensure the refrigerator is stable.
4. **Power Connection:** Plug into a dedicated outlet with the correct voltage.

User Instructions

- **Temperature Control:** Use digital panel to set fridge and freezer temperatures.
- **Smart Integration:** Connect to your smart home hub following the app instructions.
- **Water Dispenser:** Ensure water line is connected according to the manual guidelines.

Maintenance Tips

- **Cleaning:** Clean shelves and bins with mild detergent monthly.

- **Defrosting:** Automatically defrosts, manual defrost not required.
- **Filter Replacement:** Change water filter every six months.

Troubleshooting Guide

- **Not Cooling Properly:** Check temperature settings. Ensure vents are not blocked.
- **Power Issues:** Verify power supply. Check circuit breaker.

Warranty and Service Information

- **Warranty:** 2-year full warranty on parts and labor. 5-year warranty on compressor.
- **Service:** Available through authorized EcoChill service centers.

Technical Specifications

- **Dimensions:** H 180 cm x W 80 cm x D 70 cm
- **Energy Rating:** A++
- **Noise Level:** 39 dB
- **Weight:** 90 kg
