

EcoSmart ThermoControl 5000

Product Overview

The EcoSmart ThermoControl 5000 is an advanced smart thermostat designed to optimize home comfort while saving energy. With cutting-edge technology and a user-friendly interface, this thermostat offers precise climate control and the convenience of remote management through a compatible smartphone app.

Key Features

- **Smart Scheduling:** Program daily and weekly schedules to suit your lifestyle.
- **Energy Monitoring:** Track energy usage and receive insights for energy-saving opportunities.
- **Remote Access:** Control your home's climate from anywhere using the EcoSmart mobile app.
- **Voice Control:** Compatible with voice assistants like Amazon Alexa and Google Assistant.
- **Wi-Fi Connectivity:** Seamlessly connect to your 2.4 GHz home network.
- **Eco Mode:** Automatically reduces energy usage during peak hours.

Specifications

- **Model Number:** ES-TC5000
- **Connectivity:** Wi-Fi 802.11b/g/n (2.4 GHz)
- **Power Requirements:** 24VAC, requires C-wire
- **Dimensions:** 4.5 x 4.5 x 0.9 inches
- **Thermostat Range:** 45°F to 95°F

Compatibility

The EcoSmart ThermoControl 5000 is compatible with most HVAC systems, including: - Standard gas, oil, and electric systems - Heat pumps - Systems requiring a C-wire

Installation Instructions

1. **Turn Off Power:** Before installation, switch off the power to your HVAC system from the circuit breaker.
2. **Remove Old Thermostat:** Carefully detach your current thermostat from the wall, ensuring to note the wiring configuration.
3. **Mount EcoSmart ThermoControl:** Use the provided screws and anchors to attach the mounting plate to the wall.
4. **Connect Wires:** Match the wiring setup noted earlier, connecting each wire to its corresponding terminal.
5. **Attach Faceplate:** Snap the EcoSmart faceplate onto the mounted base securely.
6. **Restore Power:** Turn the power back on at the circuit breaker.

Note: For detailed visual guidance, refer to our installation video on the EcoSmart website.

Wi-Fi Connectivity and Setup

1. **Download the App:** Install the EcoSmart app on your smartphone from the App Store or Google Play.
2. **Create an Account:** Open the app and follow prompts to create a user account.
3. **Connect to Wi-Fi:** On the thermostat, access the Wi-Fi settings and select your home network. Ensure it's a 2.4GHz network.
4. **Sync with the App:** Use the app to scan the QR code displayed on the thermostat to complete pairing.

Using Your ThermoControl 5000

- **Adjust Temperature:** Use the touch screen or the app to set your desired temperature.
- **Set a Schedule:** Navigate to the 'Schedule' section in the app to program temperature changes aligned with your routine.
- **Access Eco Mode:** Enable 'Eco Mode' in settings to conserve energy during peak times.

Troubleshooting Common Issues

Wi-Fi Issues: - Verify you are connecting to a 2.4 GHz network. - Ensure the thermostat is within 30 feet of the router. - Reset the Wi-Fi by holding the reset button for 10 seconds if problems persist.

Compatibility Concerns: - Check the HVAC system is compatible using the model number guide on our website. - Confirm C-wire is connected properly.

Customer Support and Warranty

If you require further assistance, contact EcoSmart Support at 1-800-555-0199 or support@ecosmart.com. Your EcoSmart ThermoControl 5000 comes with a 2-year limited warranty covering hardware defects.
