

FitTrack Pro User Guide

Overview

FitTrack Pro is a comprehensive fitness application designed to assist users in reaching their fitness goals. With features like exercise tracking, personalized workout routines, and nutrition management, FitTrack Pro supports a healthy lifestyle through technology.

Features

1. **Exercise Tracking:** Track workouts via GPS or enter them manually. Log different types of workouts including running, cycling, yoga, and more.
2. **Personalized Workout Plans:** Receive custom workout plans tailored to your fitness level and goals. Plans include muscle-building, weight loss, and endurance training.
3. **Nutrition Tracking:** Log meals and snacks with our comprehensive food database. Set dietary goals and monitor your daily intake.
4. **Progress Monitoring:** Analyze progress with detailed graphs and statistics. Track weight, BMI, and other vital metrics.
5. **Community Features:** Connect with friends, share your achievements, and participate in fitness challenges.
6. **Wearable Integration:** Sync with popular wearables to automate tracking and enhance data accuracy.

Getting Started

- **Installation:** Download FitTrack Pro from the App Store or Google Play. Follow on-screen instructions to install.

- **Account Setup:** Create an account using your email or connect via social media. Customize your profile with fitness goals and personal metrics.

Using FitTrack Pro

1. **Dashboard:** Navigate through a user-friendly dashboard to access your stats, workout history, and nutrition log.
2. **Tracking Workouts:** Use the 'Track Workout' button to start a session. Choose the type of exercise, and the app will record the duration, distance, and calories burned.
3. **Setting Up Workouts:** Go to the 'Workouts' section. Choose a plan that suits you or customize your own.
4. **Logging Nutrition:** Enter foods by searching our extensive database or scanning barcodes. Monitor calorie intake and nutrient distribution.
5. **Community Section:** Join groups and challenges. Share updates and motivate others by posting your achievements.

Troubleshooting

- **App Crashes:** Restart the app and ensure it's updated. Clear the app cache if issues persist.
- **Update Failures:** Ensure a stable internet connection. Uninstall and reinstall the app if needed.
- **Syncing Issues:** Re-sync the wearable device through the app settings. Restart both devices if necessary.

FAQs

- **How do I update my profile information?** Go to 'Settings' > 'Profile' and edit your details.
- **Can I use the app offline?** Basic features are available offline. Sync data when you're back online.

Support

For further assistance, visit our support center at [URL] or contact our customer service at support@fittrackpro.com. Provide your device details and app version for quicker assistance.

Release Notes

- **Version 3.5:** Added new cardio workouts and enhanced tracking accuracy for cycling.
