

Welcome to the LuminoPix User Guide. This comprehensive manual will help you to install, use, and troubleshoot your LuminoPix application effectively.

Overview

LuminoPix is a powerful photo editing app designed to turn your photos into stunning masterpieces. With a wide range of filters and editing tools, LuminoPix is perfect for both amateur photographers and seasoned pros.

Key Features:

- **Filters:** Over 100 customizable filters.
- **Advanced Editing Tools:** Crop, adjust brightness, contrast, saturation, and more.
- **One-Touch Enhance:** Automatically improve your photo quality with a single tap.
- **Social Sharing:** Seamlessly share your creations with friends and family on social media.

Installation Guide

For iOS Devices:

1. Open the App Store.
2. Search for 'LuminoPix'.
3. Tap 'Get' and confirm download.
4. Once installed, tap 'Open' to launch the app.

For Android Devices:

1. Open Google Play Store.
2. Type 'LuminoPix' in the search bar.
3. Tap 'Install'.
4. Tap 'Open' to start the app.

User Interface Guide

The main screen of LuminoPix displays your gallery with options at the bottom: - **Library**: Access your photos. - **Edit**: Begin editing selected photos. - **Settings**: Customize app preferences. - **Help**: Access tutorials and support.

How to Use Features

Applying Filters:

1. Open a photo from your gallery.
2. Tap on 'Filters'.
3. Swipe to preview different filters.
4. Tap 'Apply' to confirm.

Advanced Editing:

1. Select a photo.
2. Tap 'Edit'.
3. Use the tools available to adjust brightness, contrast, and more.
4. Tap 'Save' when finished.

One-Touch Enhance:

1. Select your photo.
2. Tap 'Enhance'.
3. Review enhanced photo and 'Save'.

Troubleshooting Common Issues

App Crashes

- **Clear Cache**: Go to phone settings > Apps > LuminoPix > Clear Cache.
- **Update App**: Check for updates in the App Store or Google Play Store and install them.

- **Reinstall App:** Uninstall LuminoPix and reinstall it from the store.

Photos Not Saving

Ensure the app has permission to access your photos in phone settings.

FAQs

Q: How do I reset all edits? A: Tap on 'Undo' at the top of the screen to revert changes.

Q: Can I create custom filters? A: Yes, go to 'Filters', then 'Create New Filter'.
