

# SecureGuard Antivirus Documentation

## 1. Product Overview

SecureGuard Antivirus is designed to protect your computer from a wide range of malware threats, providing you with comprehensive online protection. With features like real-time scanning, malware protection, and automatic updates, SecureGuard ensures your digital life remains safe and secure.

## 2. Key Features

- **Real-Time Scanning:** Continuously monitors your system for threats.
- **Malware Protection:** Protects against viruses, spyware, and other malicious programs.
- **Automatic Updates:** Keeps virus definitions current to protect against the latest threats.
- **User-Friendly Interface:** Intuitive design for easy navigation.

## 3. System Requirements

- **Operating Systems:** Windows 10, 8.1, 8, 7 (SP1)
- **Processor:** 1 GHz or faster
- **RAM:** 1 GB (32-bit) or 2 GB (64-bit)
- **Hard Disk Space:** 1.5 GB available space

## 4. Installation Guide

1. **Download the Installer:** Visit our website and download the SecureGuard Installer.
2. **Run the Installer:** Double-click the downloaded file to run it.
3. **Follow Prompts:** Follow the on-screen instructions to complete the installation.
4. **Restart:** If prompted, restart your computer.

## Common Installation Issues

- **Error 404:** Re-download the installation files.
- **Conflict with Other Software:** Disable other security software before installing.

## 5. User Interface Overview

- **Dashboard:** View your security status and access features.
- **Scan Options:** Choose from Quick, Full, or Custom scans.
- **Quarantine:** Review and manage suspicious files.
- **Update:** Check for and apply updates to keep software current.

## 6. Performing Scans

- **Quick Scan:** Fast check for common threats.
- **Full Scan:** Comprehensive examination of your system.
- **Custom Scan:** Tailor scans to specific folders or drives.

**Scheduling Scans:** Access the 'Settings' menu and set up regular scan schedules.

## 7. Updating and Renewal

- **Automatic Updates:** Enabled by default; can be manually checked in the 'Update' section.
- **Renewal:** Follow prompts for subscription renewal when notified.

## 8. Troubleshooting Common Issues

- **Software Not Opening:** Restart the computer and try again; contact support if issue persists.
- **Performance Issues:** Close unnecessary programs running concurrently.
- **Update Failures:** Ensure internet connection and retry.

## 9. Customer Support

For further assistance, contact SecureGuard support via: - **Phone:** 1-800-SECURE1 - **Email:** support@secureguard.com

## 10. Security Best Practices

- Regularly back up important data.
- Do not click on suspicious links or email attachments.
- Keep all software up-to-date.

## 11. Glossary and FAQ

- **Real-Time Scanning:** Always-on monitoring feature.
- **Quarantine:** Isolated storage for potential threats.

**FAQs:** - **How do I temporarily disable the antivirus?** Go to 'Settings' > 'Protection' > Toggle off. - **What do I do if SecureGuard detects a false positive?** Add the file to the 'Excluded Files' list in settings.
