

SecureMail Pro - User Guide

Overview

SecureMail Pro is a comprehensive email service designed to ensure your electronic communication is efficient, secure, and user-friendly. With advanced security features like two-factor authentication, robust password management, and spam filtering, SecureMail Pro stands as a reliable choice for both personal and professional use.

Getting Started

1. **Account Registration:** Visit our website and click on 'Sign Up'. Complete the registration form with your personal details, including a secure password and recovery options.
2. **Email Verification:** After registering, a verification email will be sent to your provided email address. Click the verification link to activate your account.
3. **Logging In:** Use your registered email and password to log into SecureMail Pro. First-time users will be prompted to set up security settings.

Key Features

- **Password Recovery System:** Easily reset your password if forgotten by using your registered recovery email or phone number.
- **Two-Factor Authentication:** Enhance account security by enabling two-factor authentication in the security settings.
- **Spam Filtering:** Automated filtering of unwanted email to keep your inbox clean.
- **Organizational Tools:** Folders, tags, and a smart search feature to help organize your emails efficiently.

Using SecureMail Pro

- **Composing Emails:** Click 'New Email' to compose your message. Attach files by selecting the 'Attach' icon and browse your device for the files.
- **Organizing Emails:** Use the 'Move to' function to sort emails into designated folders or apply tags for easy retrieval.
- **Security Settings:** Always keep your recovery options updated to ensure a smooth password recovery process.

Enabling Two-Factor Authentication

1. Go to 'Settings' and select 'Security'.
2. Choose 'Enable Two-Factor Authentication'.
3. Follow the prompts to link your mobile device. A verification code will be sent via SMS.
4. Enter the verification code to complete the setup.

Troubleshooting

- **Issue: Unable to Reset Password**
- **Solution:** Check your recovery email and spam folders for the reset email. Clear your browser cache if the link does not work.
- **Issue: Two-Factor Authentication Code Not Received**
- **Solution:** Ensure you have network coverage and verify your mobile number in the account settings.
- **Issue: Spam Emails in Inbox**
- **Solution:** Adjust the spam filter settings in 'Security' and mark unwanted emails as spam.

Frequently Asked Questions (FAQs)

1. **How often should I change my password?**
2. For optimal security, we recommend changing your password every three months.

3. Can I access SecureMail Pro from multiple devices?

4. Yes, SecureMail Pro is accessible from any device with internet connectivity.

5. What should I do if I suspect account compromise?

6. Change your password immediately and review your account activity under 'Security Settings'.
