

SwiftMail Pro Documentation

Introduction

SwiftMail Pro is a robust email client designed to provide a seamless emailing experience with enhanced security, user-friendly interface, and efficient management tools. Whether you're organizing your inbox or securing your communication, SwiftMail Pro has you covered.

System Requirements

- **Operating Systems Supported:** Windows 10 or later, macOS 10.12 or later
- **Processor:** 1 GHz or faster
- **RAM:** 2 GB minimum
- **Disk Space:** 200 MB
- **Internet Connection:** Required for installation and updates

Installation Instructions

1. **Download the Installer:** Visit our website and navigate to the 'Downloads' section. Select the correct version for your operating system.
2. **Run the Installer:** Double-click the downloaded file and follow the on-screen instructions.
3. **Complete Setup:** Once installed, open SwiftMail Pro and log in with your credentials.

Account Setup

1. **Sign Up:** If you don't have an account, click 'Sign Up' and enter your details.
2. **Verification:** You will receive a verification email. Click the link to verify your new account.
3. **Profile Settings:** Once logged in, go to 'Account Settings' to customize your profile and security settings.

Managing Your Emails

- **Composing Emails:** Click 'New Email', enter the recipient's address, subject, and message.
- **Organizing Inbox:** Use folders, labels, and filters to manage incoming emails.
- **Search Functionality:** Use the search bar for quick retrieval of important emails.

Security Features

- **Password Management:** Change your password under 'Account Settings'. Choose 'Security', then 'Change Password'.
- **Two-Factor Authentication:** Enable this for additional security from the 'Security' tab.

Troubleshooting

Resetting Passwords

1. Navigate to the login page and click 'Forgot Password?'
2. Enter your email address and submit.
3. Check your inbox or spam folder for a reset link.
4. If the link has expired, request a new one by repeating the steps.

Email Not Receiving

- Ensure that there are no connectivity issues.
- Check if emails are being diverted to spam.
- Update your email filters and rules to accept crucial senders.

Frequently Asked Questions (FAQs)

- **How do I update my email address?**
 - Navigate to 'Account Settings', click on 'Profile Information', and update your email.
- **What do I do if the reset link doesn't work?**
 - Contact support for generating a new link.
